# Pulsar

Sesalnik za sesanje strupenih in nevarnih snovi.

Vacuum cleaner for toxic and dangerous substances

Zaradi posebne filtracije in zasnove, pri sesanju nevarnih snovi v prostor ne vrača drobnih strupenih delcev, ki so lahko izredno nevarni za okolje in škodljivi za dihalni sistem ob vdihovanju.

Suction of toxic and dangerous substances involves the use of a vacuum machine suitable to eliminate those particles that - when using a common vacuum cleaner - come back into the environment, thus becoming harmful for health if inhaled.

## H CERTIFIKAT

H (visoka nevarnost) primeren za sesanje vseh tipov nevarnega prahu vključno z rakotvornimi in patogenimi snovmi po EN 60335-2-69 ANNEX AA6 standardu.

## H CERTIFICATION

H (high hazard) for separating all dusts with all limit values of occupational exposure including carcinogenic and pathogenic dusts (according to EN 60335-2-669 ANNEX AA6 Standard).

## Priložen pribor Ø 38 Standard accessories Ø 38

Na voljo je tudi veliko dodatne opreme, daljša gibljiva cev, dodatne alu PVC prevlečene cevi, papirnate filtrirne vrečke ...

## FILTER VREČA IZ BLAGA - OPTIONAL CLOTH BAGS - OPTIONAL
