

Sharon is an innovative self-contained machine, designed for cleaning small areas of both carpet and hard floor.

A special device allows to switch from carpet to hard floor cleaning by simply turning a knob. Sharon can be used also with a hand tool for cleaning armchairs and hard-to-reach spots (NS10PN). The water-flow can be adjusted for a maintenance cleaning or a restoration deep-cleaning.

Main application fields: hotels, restaurants, clubs, pubs, offices, banks, shops, private houses, hospitals, nursing homes, carpet shops.

Advantages of Sharon:

1. It is possible to clean both carpet and hard floor with a single machine. The commutation from carpet to hard floor cleaning and vice versa is done easily, simply turning the lever on the vacuum head.
2. Reduced width (only 29 cm) for professional cleaning even of small surfaces of carpet and hard floor.
3. Possibility to push the machine forward on hard floor without lifting the vacuum head thanks to proper support wheels.
4. The machine is light and easy to carry.
5. Vacuum head in die-cast aluminium, practically indestructible.
6. Special profile of the vacuum head, which allows a shorter drying time.
7. Plastic handle, which avoids the cooling of the worker's hands.
8. The height of the handle is adjustable so that it can be regulated according to the stature of the worker.
9. Water spraying can be operated simply turning the handle of the machine.
10. Tubes in stainless steel, strong and rustproof for the whole machine life.
11. Quick disconnect spray nozzle, which can be removed by hand without using any tool. The nozzle can be cleaned easily.
12. The hand tool NS10PN-M, supplied as standard, allows to clean hard-to-reach corners.

spray control

quick disconnect nozzle

Other technical advantages of Sharon

1. High density polyethylene tanks, very strong and made for lasting a long time.
2. Transparent unbreakable cover, which allows to see the dirty water while it is sucked.
3. Recovery tank easily detachable from the machine body, in order to make the tank emptying and cleaning easier.
4. The filters of the vacuum are is easy to reach and removable for an easy cleaning.
5. The gaskets are replaceable by hand since they are not glued. Easy to clean and change.
6. Strong wheels, in antimark rubber.
7. Brass quick-disconnect couplings, reliable and strong.
8. Water pump with bypass, which allows an automatic regulation of the optimal water flow according to the tool used. Moreover, the bypass device makes the pump more reliable and avoids problems in the years.
9. Pump built on Santoemma specifications, for a longer life.
10. Vacuum motor with thermal protection against overload.
11. Vacuum motor treated against rust.
12. Both motor and pump can work continuously.
13. Modular design that makes the maintenance easier. The maintenance of the machine can be done at low costs.

Technical Data

Recovery tank capacity:	12 litres
Solution tank capacity:	12 litres
Vacuum motor:	2 stages
Power:	1000 W
Maximum waterlift:	2200 mm H ₂ O
Maximum air-flow:	50 l/sec.
Pump with by-pass:	vibrating
Power:	70 W
Maximum pressure:	4 bar
Maximum water-flow:	1,5 l/min.
Cleaning width (carpet/hard floor):	270/290 mm
Number of nozzles:	1
Max. performance:	120 sq. meter/h
Cable length:	10 m
Hose length:	2,5 m
Weight (machine body):	16 kg
Weight (packaged machine):	18 kg
Dimensions:	29 x 78 x 90 cm
Package dimensions:	36 x 60 x 76 cm
Standard colours:	blue
Tank construction:	High density polyethylene

Complete machine for carpet and hard floor cleaning + hoses H10-M + plastic hand tool NS10PN-M
